

Christian Tomas Ocampo

San Jose, CA | (408) 849-8302 | chris0112tomas@gmail.com

EDUCATION

University of California, Berkeley

Bachelor of Arts in Computer Science

Berkeley, CA

Expected May 2029

- ColorStack Member, Codebase Developer

Relevant Coursework: Structure and Interpretation of Computer Programs, Data Structures, Discrete Math and Probability Theory, Calculus I and II, Linear Algebra, Principles of Data Science

SKILLS

Languages: Java, Python, JavaScript

Frameworks & Libraries: React, Next.js, NumPy

Tools & Platforms: Git/GitHub, Supabase, REST APIs

WORK EXPERIENCE

Next for Autism (NFA)

Software Developer

Berkeley, CA

February 2026 - Present

- Built a full-stack mentorship platform supporting 100+ users, replacing manual workflows using React, Next.js, and Supabase.
- Developed role-based dashboards and admin tools for content management, scheduling, and progress tracking across a 16-week program.
- Implemented mentor-mentee matching system and automated email workflows, reducing manual coordination and saving ~3-5 hours per week for program staff.

Boys & Girls Clubs of Silicon Valley (BGCSV)

Code + Create STEM Program Specialist

San Jose, CA

Summer 2025

- Led daily STEM workshops for 15–20 elementary and middle school students using LEGO robotics, animation, and digital storytelling to develop computational thinking and creativity.
- Designed and taught an original lesson introducing Swift programming fundamentals through Swift Playgrounds, fostering early coding literacy.
- Collaborated with staff to adapt lessons, manage classroom dynamics, and enhance engagement while strengthening communication and teamwork skills.

PROJECTS

World Generation & Exploration Engine | Java

April 2026

- Built a 2D tile-based world exploration game in Java with procedurally generated rooms and hallways using randomized algorithms and BFS for connectivity.
- Implemented avatar movement, shortest-path pathfinding, save/load functionality, and dynamic HUD rendering within an interactive game loop.

Ngordnet: WordNet & NGrams Analysis Tool | Java

March - April 2026

- Built a WordNet/NGrams analysis tool processing 82K+ synsets using graph-based algorithms for fast retrieval and visualization.
- Implemented time-series analysis with ranking and filtering to compare multi-word trends efficiently.

ANTS - Strategic Tower Defense Game | Python

October 2025

- Developed a tower defense game using object-oriented design, modeling insect behavior and game state.
- Implemented extensible class hierarchies with recursion and linked structures to support scalable mechanics and GUI simulation.

LEADERSHIP EXPERIENCE

BGCSV Aspires

Ambassador

San Jose, CA

August 2024 - May 2025

- Guided and mentored underrepresented students in pursuing postsecondary education and scholarships of up to \$5,000 through workshops, events, and peer support.
- Organized outreach initiatives (presentations, social media, events) increasing program participation by 75%.
